NSW BUREAU OF CRIME STATISTICS AND RESEARCH

ACKNOWLEDGEMENTS

The production of this report was greatly assisted by officers within the NSW Police Service. Special thanks are due to officers in Information Technology and in Corporate Information, Executive Support Group. The following officers of the Bureau of Crime Statistics and Research contributed significantly to the production of this report. Thanks to Florence Sin who carried out the desktop publishing of the report. Thanks also to Mark Ramsay and Tracy Painting of the Data Quality Unit for collecting, validating and advising on the data contained in the report.

INTRODUCTION

This report presents data on crimes reported to or detected by NSW Police from January 2002 to December 2004. The data were extracted from the Computerised Operational Policing System (COPS) of the NSW Police Service in January 2005.

This report includes an overview of trends in the most recent two-year period for a selection of serious offence categories. The overview of this year's report indicates that none of the sixteen major offence categories are trending upwards. In the two years to December 2004 nine offence categories showed significant downward trends. These offence categories were *robbery without a weapon*, *robbery with a weapon not a firearm*, *break and enter – dwelling*, *break and enter – non-dwelling*, *motor vehicle theft*, *steal from motor vehicle*, *steal from retail store*, *steal from dwelling* and *steal from person*. Property crime has, in general, continued the downward trends that have been observed over the past three years.

Since the last report, the Bureau of Crime Statistics and Research has conducted a review of our criminal offence categories, resulting in some significant changes. The composition of our robbery categories have changed and as a consequence, robbery data reported here are not comparable to previously published figures. However, comparable trend data can be obtained on request. Some new offences are included in this publication for the first time. These include trespass, resist or hinder officer and drug offences involving amphetamines and ecstasy. More information about the changes can be read in the explanatory notes.

DEFINITIONS AND EXPLANATORY NOTES

The data in this report are extracted from the NSW Police Service's Computerised Operational Policing System (COPS). This system is used for record-keeping for all police operations, not just for criminal matters.

In this report:

- the counting units are recorded *criminal incidents* rather than recorded *offences* (except for murder and manslaughter where the counting units are victims, and driving offences where the counting units are legal actions commenced); and
- the data are categorised by date of *reporting* to police (or date of detection by police) rather than by date of *occurrence* of the offence.

RECORDED CRIMINAL INCIDENTS

A *criminal incident* is defined as an activity detected by or reported to police which:

- involved the same offender(s);
- involved the same victim(s);
- occurred at the one location;
- occurred during one uninterrupted period of time;
- falls into one offence category;
- falls into one incident type (for example, 'actual', 'attempted', 'conspiracy').

One incident may involve two offenders assaulting the same victim. This would be recorded as one assault incident. Alternatively, suppose a man reports to police that he found his neighbour in the process of damaging his car and, when confronted, the neighbour assaulted him. For such an event, two criminal incidents are recorded because two distinct offence types are involved (malicious damage to property and assault) even though the same parties were involved at the same time and in the same place.

RECORDED VICTIMS

For murder and manslaughter only, the counting units used are victims. Under the definition of a criminal incident (same parties, same time, same place, same offence and same incident type) one murder or manslaughter incident could involve two or more persons being killed. Because of the seriousness of these offences and their relatively small numbers, it is considered to be more appropriate to count the number of victims, rather than the number of criminal incidents. Hence, where *one* murder incident involves a person killing six people, *six* murder victims are counted.

LEGAL ACTIONS COMMENCED

For driving offences, including driving causing death, the counting unit is the number of legal actions commenced by police rather than the number of incidents recorded. Legal actions include infringement notices, court referrals, formal cautions under the *Young Offenders Act 1997* and youth justice conference referrals. Incidents that do not result in a formal legal process are not counted. Legal actions have replaced recorded incidents for driving offences from 2003 onwards. This is because in July 2003, NSW Police changed the way they classify traffic incidents on COPS and, as a result, the incidence of specific driving offences can no longer be determined directly from police incident categories. Driving offence data from 2003 onwards are not comparable with earlier statistics.

OFFENCE CATEGORIES

The classification of offences in this report is broadly based on the Australian Standard Offence Classification (ASOC) devised by the Australian Bureau of Crime Statistics and Research (ABS 1997 Cat. No. 1234.0).

For all *type of offence* classifications used in the report, Appendix 1 lists the offence categories included in the classification. The original offence categories are those used by the NSW Police Service and do not necessarily correspond exactly with offences defined in legislation.

IMPORTANT NOTE. In 2004 the Bureau of Crime Statistics and Research reviewed the offence classifications used in this report. The review aimed to reduce the size of 'other' offence categories and improve the composition of offence categories. Arising from the review are several significant changes:

1. The composition of all three types of robbery (without a weapon, with a firearm and with a weapon not a firearm) has changed significantly. Previously *demand money with menaces* was counted as a separate offence but it is now included within robbery. The method by which the involvement of a weapon is identified has also been improved and consequently the number of armed robberies identified has increased. **Robbery statistics in this report should not be compared with robbery statistics reported in any previous publications. Please contact the Bureau for comparable robbery data for previous years.** For comparability, the new counting rules have been retrospectively applied to the data for 2002 and 2003 published in this report.
2. Drug offences that involve amphetamines and ecstasy are now separately identified. Previously they were contained within 'other drugs'.
3. The following offences are now separately enumerated in the report: *harassment, intimidation and private nuisance, receiving or handling stolen goods, trespass, criminal intent, manufacture drug, liquor offences, pornography offences, escape custody, resist or hinder officer and transport regulatory offences.*
4. The following offences are still included in the report but their composition has changed significantly: *other offences against the person, other offences against justice procedures, prostitution offences, other drug offences, regulated and prohibited weapons offences and other offences.*

There have also been significant changes in the way driving offences are reported. As mentioned above, from 2003 onwards the counting units for driving offences are the number of legal actions commenced rather than the number of recorded incidents. This change means that very detailed information is available about the specific offence committed through the act and section of the charge (or lawpart code). As a result we have been able to align the offence categories reported for driving offences with those in the Australian Standard Offence Classification (ASOC). Driving offence data from 2003 onwards are not comparable with earlier statistics.

COUNTING PERIOD

Criminal incidents are included in the counting period in which they were reported to or detected by police.

In most cases criminal incidents are recorded on COPS on the day of reporting. It is possible for some updating of data to occur. That is, data extracted for a specified period of time (incidents reported in 2003, for example), may differ according to the date of extraction of the data.

PROCEEDINGS AGAINST ALLEGED OFFENDERS

Police may proceed against alleged offenders through a variety of legal or other processes. Most alleged offenders are referred to the NSW criminal courts. The more serious offences are dealt with by way of a No-Bail Court Attendance Notice (previously known as a Court Attendance Notice (CAN)) or a Bail Court Attendance Notice, which was known as a Charge prior to July 2003. In these instances, the alleged offender is arrested, taken to a police station, fingerprinted and the details of the person and charge recorded. Alternatively a Field Court Attendance Notice may be issued by police at other locations. A Future Service Court Attendance Notice (which used to be called a Summons) is used for less serious offences.

Some alleged offenders are proceeded against but diverted from the criminal court system. For many minor offences police can issue Infringement Notices. By paying the prescribed penalty the offender avoids having to go to court. Police also have the discretion to issue warnings to some offenders. Under the *Young Offenders Act 1997* a juvenile offender can be issued with either a warning, a caution or referred to a youth justice conference. A youth justice conference is a face to face meeting between offenders, victims and their support persons. The offending behaviour is discussed and an outcome plan for the offender negotiated.

Some alleged offenders are not proceeded against. The alleged offender may be deceased, be under the age of ten years, have diplomatic immunity or be mentally incapable of forming criminal intent. The victim or the Director of Public Prosecutions may decide not to prosecute. A small number of alleged offenders are temporarily not proceeded against while police await further advice, for example whether a juvenile should be referred to a youth justice conference.

CLEARED CRIMINAL INCIDENTS

A cleared criminal incident is one which, in the view of police, has been satisfactorily cleared by the commencement of legal proceedings or otherwise.

An incident is cleared by the commencement of legal proceedings when police have laid a charge or an information against at least one person. The information may have been laid with a view to the issuing of a warrant, summons or other process for the purpose of bringing an offender before the court.

A criminal incident is cleared other than by commencement of legal proceedings when, under normal circumstances, a charge or information would have been laid against at least one person, but, for a variety of reasons, police have been unable to make an arrest, despite knowing the identity of the offender and having sufficient evidence to support a charge. Examples of situations in which an offence may be cleared other than by charge include the following:

- the offender is a juvenile and is cautioned;
- the offender has died before a charge is made or information laid;
- the offender has been committed to a psychiatric institution and is unlikely to be released;
- there is an obstacle to charging, such as diplomatic immunity;
- the complainant or essential witness is dead and proceedings would be aborted;
- the offender is serving a sentence and police consider that no useful purpose would be served by prosecution.

REGIONAL STATISTICS

Statistics are provided on the number of criminal incidents (victims for murder and legal actions for driving offences) recorded for each of the Statistical Divisions of NSW as defined by the Australian Bureau of Statistics (ABS). Within the Sydney Statistical Division, statistics are provided for Statistical Subdivisions. Recorded criminal incidents which occurred in correctional, detention or remand centres, however, are not counted in the Statistical Division in which the incident occurred. Numbers of such incidents are noted at the foot of each table. Appendix 2 provides maps indicating the location of each Statistical Division and Sydney Statistical Subdivision. Appendix 3 lists the Local Government Areas (LGAs) within each of the Statistical Divisions and Statistical Subdivisions. In previous years South Sydney was a LGA within the Inner Sydney SSD. However, since the start of 2004, South Sydney has been incorporated into the Sydney LGA. A criminal incident is counted within a particular region when the location of the offence falls within that region.

For the rate calculations, population data were obtained from the Australian Bureau of Statistics publication: *Regional Population Growth, Australia and New Zealand, 2002-03*, Cat. No. 3218.0 (for 2002 and 2003 population estimates). As no population estimates were available for 2004 when this report was published, rates for 2004 were calculated using 2003 population estimates.

ORGANISATION OF THE REPORT

The report is organised into five main sections as follows. The first section is an overview of major trends in recorded criminal incidents (recorded victims for murder) over the two-year period from January 2003 to December 2004. Figures showing trends in selected offences are presented, as well as summary points indicating which trends are statistically significant and the highest and lowest offending rates in Statistical Divisions of rural NSW and Statistical Subdivisions of Sydney. This section also includes figures showing trends in methods of proceeding against offenders and alleged offenders which lead to attendance at court.

The second section presents, for all categories of offence, the monthly numbers of recorded criminal incidents (recorded victims for murder and manslaughter and legal actions for driving offences). There are three tables in this section, one each for 2002, 2003 and 2004. Each table provides a total for the year and the annual rate per 100,000 population. The data used for the trend analysis in the first section of the report are included in these tables. Note, however, that the trend analysis uses only the most recent two years of data.

The third section provides monthly numbers of alleged offenders proceeded against, by the type of process pursued, for those criminal incidents recorded by NSW Police in the reference year. There are three tables in this section, one each for 2002, 2003 and 2004. Each offender or alleged offender appears only once in the table for each event (there can be more than one criminal incident associated with a single event). The processes are arranged in a hierarchy with the offender or alleged offender appearing in the most serious category where multiple incidents are involved. For example if an event involves two incidents and the alleged offender is charged for one incident but receives a warning for the second incident, the alleged offender appears only in the 'Charged' category. Note that in these tables, the year refers to the year in which the criminal incident or incidents were reported to police. For example, if an incident was reported to police in 2003 but the alleged offender was not apprehended and charged until 2004, the charge is recorded for 2003.

The fourth section provides the numbers and percentages of cleared criminal incidents, for selected types of offence, for 2002, 2003 and 2004. The offence types included in these tables are those where the crime is likely to have been reported to police, rather than discovered or detected by police. Offence types where the numbers of recorded criminal incidents are influenced by police law enforcement activity (drug offences, for example) are excluded. For such offence types, the clear-up percentages are very high because clearing the offence generally occurs simultaneously with its detection (that is, an arrest is made when the crime is discovered).

The tables for 2002 and 2003 show the number of recorded criminal incidents and, of these, the number and percentage which had been cleared 30 days, 90 days and 180 days after the incident was reported to police. The table for 2004 is similar to those for 2002 and 2003 except that there are only two follow-up periods, 30 days and 90 days. Because the data for this report were extracted in January 2004, the clear-up status after 90 days could not be determined for any offences reported in the last three months of 2004. Hence, the clear-up data for 2004 are for the first nine months of the year only.

In the fifth section of the report there are 35 tables, one for each major offence category. Each table gives the numbers and rates (per 100,000 population) of recorded criminal incidents (for murder, recorded victims and for driving offences, legal actions) for the periods January to December 2002, 2003 and 2004, for each of the NSW Statistical Divisions and for each Statistical Subdivision in Sydney. Recorded criminal incidents which occurred in custodial institutions are counted separately; they are not included in the data for the Statistical Division where the custodial institution is located. Note that both the numbers and rates of recorded criminal incidents in 2003 have been updated since the previous edition.

**OVERVIEW OF MAJOR TRENDS,
2003 AND 2004
NEW SOUTH WALES**

OVERVIEW OF MAJOR TRENDS

TRENDS IN RECORDED CRIME

However trends in recorded crime are presented, their interpretation is a difficult task. The recorded criminal incident data presented in this report are based on information derived from the NSW Police Service Computerised Operational Policing System (COPS), so only those incidents which are reported to, or detected by, police are included. The trends in recorded crime shown in this report will, therefore, reflect movements in the underlying factors which influence the detection, reporting and recording of crime, as well as changes in the true level of crime in the community.

An alternative measure of the level of crime in NSW is available from crime victim surveys, for example the *Crime and Safety Survey* which is conducted annually by the Australian Bureau of Statistics (ABS).¹ As well as providing an estimate of the victimisation rate in the community for a selected set of offences, this survey measures the proportion of crimes which are not reported to police, and are therefore not recorded in the official statistics. In particular, personal crimes, such as assault and robbery, are less likely to be reported than crimes which involve households. For example, *Crime and Safety, New South Wales, 2004* shows that, in the twelve-month period to April 2004, while 91 per cent of motor vehicle thefts and 67 per cent of break and enter offences (crimes against households) were reported to police, only 36 per cent of all alleged assault offences were reported during that period. Given that some offences have low reporting rates, it is possible that changes in recorded crime rates over time for these offences largely reflect changes in reporting rates.

Public willingness to report crime, however, is just one of the extraneous factors which can affect trends in recorded crime. Shifts in policing policy can also have a marked effect on the number of recorded drug offences, drink driving offences, cases of offensive behaviour or of receiving stolen goods. For these offences, therefore, recorded rates probably do not accurately reflect actual rates. For this reason, the more detailed comparisons of crime rates and examination of trends in this document are restricted to categories of offence which are reported to, rather than detected by police.

The interpretation of trends in official reports of crime can be considerably more difficult than the interpretation of trends in unemployment or inflation statistics. The ease with which recorded crime statistics can be misunderstood creates a temptation to offer an authoritative explanation for each major crime trend. Indeed, in many instances it is simply impossible to state with any assurance why a particular trend has appeared. This report, therefore, confines itself to identifying and describing trends in recorded crime, rather than explaining them.

The trends examined in this overview cover a twenty-four month period, from January 2003 to December 2004. For comparative purposes, statistics for 2002 have been included in the detailed tables in the sections which follow. For some offence categories, separate trends have been presented for various offence subcategories; in particular, sexual offences, robbery, break and enter, and stealing offences have been further disaggregated.

For each offence category or subcategory except murder, a statistical test for trend was applied to the monthly numbers of recorded criminal incidents over the twenty-four month period from January 2003 to December 2004.² In the case of murder, the statistical test for trend was applied to the monthly numbers of victims over the same period. For those offences where a statistically significant trend was found, the extent of the trend is indicated by the percentage change between the total recorded number of incidents for the twelve months of January to December 2003 and the total recorded number of incidents for the same period in 2004.

SUMMARY OF TRENDS

In the following summary the bracketed figures denote the percentage change in the total number of recorded criminal incidents between the consecutive twelve-month periods January to December 2003 and January to December 2004. The percentage change is shown only for those offences where a statistically significant upward or downward trend was detected.

Significant downward trends

There was a statistically significant downward trend in the monthly numbers of recorded criminal incidents for the following offences:

- robbery without a weapon (down by 21.5%, see Figure 4)
- robbery with a weapon not a firearm (down by 12.6%, see Figure 4)
- break and enter – dwelling (down by 10.7%, see Figure 5)
- break and enter – non-dwelling (down by 18.4%, see Figure 5)
- motor vehicle theft (down by 5.0%, see Figure 6)
- steal from motor vehicle (down by 8.8%, see Figure 6)
- steal from retail store (down by 16.8% see Figure 7)
- steal from dwelling (down by 10.4%, see Figure 7)
- steal from person (down by 23.9%, see Figure 7)

Offences where there was no upward or downward trend

There was no statistically significant generally upward or downward trend in the monthly numbers of recorded criminal incidents³ for any of the following offences:

- murder (see Figure 1)
- total assault (see Figure 2)
- assault - domestic violence related (see Figure 2)
- sexual assault (see Figure 3)
- indecent assault, act of indecency, other sexual offences (see Figure 3)
- robbery with a firearm (see Figure 4)
- fraud (see Figure 8)
- malicious damage to property (see Figure 9).

Significant upward trends

For the major crime categories, there were no statistically significant upward trends in the monthly numbers of recorded criminal incidents for 2004.

DESCRIPTION OF TRENDS

Graphs in this section show monthly trends for a selected set of offences in NSW, between January 2003 and December 2004. For each offence category, information is given on the statistical significance of any trend shown in the graphs, and the annual rate of offences per 100,000 resident population. In addition, geographical areas with the three highest rates, and the three lowest rates of recorded criminal incidents in NSW are listed. Within the Sydney Statistical Division, recorded crime rates are detailed by Statistical Subdivision (SSD). Outside the Sydney Statistical Division, recorded crime rates are detailed by Statistical Division (SD). The rate calculations are based on resident population data and are calculated as recorded offences per 100,000 population in each Statistical Division or Subdivision.⁴ It should be noted that the Inner Sydney Statistical Subdivision has high recorded crime rates because, compared with other regions, the resident population is small relative to the 'transient' or non-resident population which uses the area for business, entertainment, shopping, etc. That is, the high transient population is not reflected in the rate calculation.

Figure 1: Murder

Murder

With such small numbers of murder victims, the month to month variation is extremely marked. For this reason it is difficult to detect trends over such a short period. Because of the small numbers of murder victims, it is not sensible to make regional comparisons.

Trend (Jan 2003 - Dec 2004): No statistically significant upward or downward trend.

NSW annual rate (2004): 1.0 per 100,000 population

Figure 2: Assault

Assault

Total assault

Trend (Jan 2003 - Dec 2004): No statistically significant upward or downward trend.

NSW annual rate (2004): 1,031.7 per 100,000 population

Highest rates: Far West SD - 2,594.6 per 100,000 population

North Western SD - 2,520.5 per 100,000 population

Inner Sydney SSD - 2,262.4 per 100,000 population

Lowest rates: Central Northern Sydney SSD - 322.0 per 100,000 population

Lower Northern Sydney SSD - 477.3 per 100,000 population

Northern Beaches SSD - 523.7 per 100,000 population

Assault - Domestic violence related

Trend (Jan 2003 - Dec 2004): No statistically significant upward or downward trend.

NSW annual rate (2004): 385.3 per 100,000 population

Highest rates: Far West SD - 1,213.6 per 100,000 population

North Western SD - 1,097.4 per 100,000 population

Blacktown SSD - 668.9 per 100,000 population

Lowest rates: Central Northern Sydney SSD - 122.4 per 100,000 population

Lower Northern Sydney SSD - 164.1 per 100,000 population

Northern Beaches SSD - 180.0 per 100,000 population

Figure 3: Sexual assault and indecent assault, act of indecency, other sexual offences

Sexual offences

Sexual assault

Trend (Jan 2003 - Dec 2004): No statistically significant upward or downward trend.

NSW annual rate (2004): 63.1 per 100,000 population

Highest rates: North Western SD - 140.2 per 100,000 population
 Far West SD - 138.1 per 100,000 population
 Murrumbidgee SD - 100.0 per 100,000 population

Lowest rates: Central Northern Sydney SSD - 20.5 per 100,000 population
 Lower Northern Sydney SSD - 20.5 per 100,000 population
 Inner Western Sydney SSD - 34.3 per 100,000 population

Indecent assault, act of indecency, other sexual offences

Trend (Jan 2003 - Dec 2004): No statistically significant upward or downward trend.

NSW annual rate (2004): 79.5 per 100,000 population

Highest rates: North Western SD - 161.2 per 100,000 population
 Inner Sydney SSD - 135.7 per 100,000 population
 Far West SD - 121.4 per 100,000 population

Lowest rates: Central Northern Sydney SSD - 43.2 per 100,000 population
 Lower Northern Sydney SSD - 46.8 per 100,000 population
 St George-Sutherland SSD - 50.4 per 100,000 population

Figure 4: Robbery with and without a weapon

Robbery

*Robbery without a weapon**

Trend (Jan 2003 - Dec 2004): A statistically significant downward trend (down by 21.5%)

NSW annual rate (2004): 73.7 per 100,000 population

Highest rates: Inner Sydney SSD - 431.2 per 100,000 population

Inner Western Sydney SSD - 136.1 per 100,000 population

Central Western Sydney SSD - 136.0 per 100,000 population

Lowest rates: Murray SD - 14.0 per 100,000 population

South Eastern SD - 16.1 per 100,000 population

Central Northern Sydney SSD - 22.4 per 100,000 population

*Robbery with a firearm**

Trend (Jan 2003 - Dec 2004): No statistically significant upward or downward trend.

NSW annual rate (2004): 9.8 per 100,000 population

Highest rates: Inner Sydney SSD - 42.2 per 100,000 population

Inner Western Sydney SSD - 28.3 per 100,000 population

Central Western Sydney SSD - 22.9 per 100,000 population

Lowest rates: No robbery with a firearm were recorded in Central West SD

No robbery with a firearm were recorded in Far West SD

Northern SD - 1.1 per 100,000 population

*Robbery with a weapon not a firearm**

Trend (Jan 2003 - Dec 2004): A statistically significant downward trend (down by 12.6%)

NSW annual rate (2004): 38.8 per 100,000 population

Highest rates: Inner Sydney SSD - 205.6 per 100,000 population

Inner Western Sydney SSD - 105.4 per 100,000 population

Central Western Sydney SSD - 70.5 per 100,000 population

Lowest rates: Far West SD - 4.2 per 100,000 population

Murray SD - 5.2 per 100,000 population

Northern Beaches SSD - 6.0 per 100,000 population

* The composition of robbery offences has changed significantly since the last report. For robbery offences the statistics in this report cannot be compared with previously reported data. (See Explanatory Notes, page vii.)

Figure 5: Break and enter – dwelling and non-dwelling

Break and enter

Breaking and entering - dwelling

Trend (Jan 2003 - Dec 2004): A statistically significant downward trend (down by 10.7%)

NSW annual rate (2004): 832.1 per 100,000 population

Highest rates: North Western SD - 1,579.3 per 100,000 population
 Inner Sydney SSD - 1,304.9 per 100,000 population
 Far West SD - 1,201.0 per 100,000 population

Lowest rates: Central Northern Sydney SSD - 487.3 per 100,000 population
 Northern Beaches SSD - 550.2 per 100,000 population
 South Eastern SD - 568.3 per 100,000 population

Breaking and entering - non-dwelling

Trend (Jan 2003 - Dec 2004): A statistically significant downward trend (down by 18.4%)

NSW annual rate (2004): 444.0 per 100,000 population

Highest rates: North Western SD - 996.6 per 100,000 population
 Inner Sydney SSD - 977.1 per 100,000 population
 Far West SD - 765.8 per 100,000 population

Lowest rates: Central Northern Sydney SSD - 208.5 per 100,000 population
 St George-Sutherland SSD - 221.6 per 100,000 population
 Inner Western Sydney SSD - 251.1 per 100,000 population

Figure 6: Motor vehicle theft and steal from motor vehicle

Motor vehicle theft and steal from motor vehicle

Motor vehicle theft

Trend (Jan 2003 - Dec 2004): A statistically significant downward trend (down by 5.0%).

NSW annual rate (2004): 495.6 per 100,000 population

Highest rates: Inner Sydney SSD - 1,067.0 per 100,000 population

Canterbury-Bankstown SSD - 839.4 per 100,000 population

Central Western Sydney SSD - 746.3 per 100,000 population

Lowest rates: Central Northern Sydney SSD - 156.5 per 100,000 population

Northern SD - 179.2 per 100,000 population

Northern Beaches SSD - 200.1 per 100,000 population

Steal from motor vehicle

Trend (Jan 2003 - Dec 2004): A statistically significant downward trend (down by 8.8%).

NSW annual rate (2004): 892.3 per 100,000 population

Highest rates: Inner Sydney SSD - 3,015.2 per 100,000 population

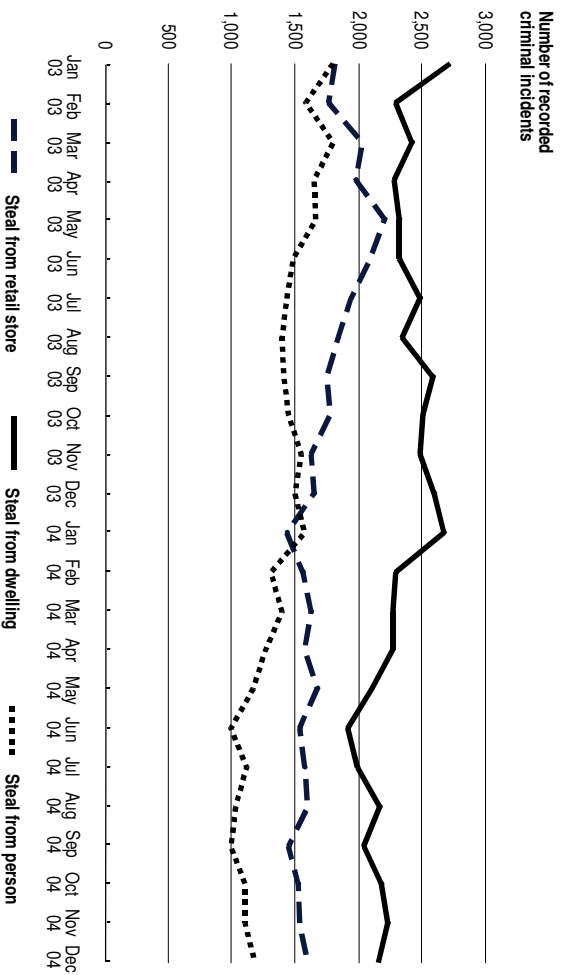

North Western SD - 1,280.4 per 100,000 population

Eastern Suburbs SSD - 1,277.2 per 100,000 population

Lowest rates: Central Northern Sydney SSD - 442.0 per 100,000 population

Far West SD - 552.4 per 100,000 population

South Eastern SD - 580.9 per 100,000 population

 South Eastern SD - 180.9 per 100,000 population

Steal from dwelling

Trend (Jan 2003 - Dec 2004): A statistically significant downward trend (down by 10.4%)

NSW annual rate (2004): 393.0 per 100,000 population

Highest rates: Far West SD - 975.1 per 100,000 population
 North Western SD - 722.1 per 100,000 population
 Murray SD - 629.9 per 100,000 population

Lowest rates: Central Northern Sydney SSD - 187.0 per 100,000 population
 Canterbury-Bankstown SSD - 188.7 per 100,000 population
 Fairfield-Liverpool SSD - 204.7 per 100,000 population

Steal from person

Trend (Jan 2003 - Dec 2004): A statistically significant downward trend (down by 23.9%)

NSW annual rate (2004): 213.4 per 100,000 population

Highest rates: Inner Sydney SSD - 1,767.2 per 100,000 population
 Inner Western Sydney SSD - 357.1 per 100,000 population
 Eastern Suburbs SSD - 349.7 per 100,000 population

Lowest rates: South Eastern SD - 48.9 per 100,000 population
 Murrumbidgee SD - 56.9 per 100,000 population
 Murray SD - 56.9 per 100,000 population

Figure 8: Fraud**Fraud**

Trend (Jan 2003 - Dec 2004): No statistically significant upward or downward trend.

NSW annual rate (2004): 469.0 per 100,000 population

Highest rates: Inner Sydney SSD - 1,685.8 per 100,000 population

Central Western Sydney SSD - 695.4 per 100,000 population

Eastern Suburbs SSD - 609.2 per 100,000 population

Lowest rates: Murray SD - 206.5 per 100,000 population

Central West SD - 266.5 per 100,000 population

Central Northern Sydney SSD - 266.7 per 100,000 population

Figure 9: Malicious damage to property

Malicious damage to property

Trend (Jan 2003 - Dec 2004): No statistically significant upward or downward trend.

NSW annual rate (2004): 1,415.0 per 100,000 population

Highest rates: North Western SD - 2,705.3 per 100,000 population

Far West SD - 2,435.6 per 100,000 population

Inner Sydney SSD - 2,013.0 per 100,000 population

Lowest rates: Central Northern Sydney SSD - 676.7 per 100,000 population

Northern Beaches SSD - 868.2 per 100,000 population

Lower Northern Sydney SSD - 935.1 per 100,000 population

TRENDS IN METHODS OF PROCEEDING AGAINST OFFENDERS OR ALLEGED OFFENDERS

The information which follows highlights trends in the number of persons proceeded against to court by NSW Police. These proceedings relate to criminal incidents recorded between January 2003 and December 2004.

Bail Court Attendance Notice*

Trend (Jan 2003 - Dec 2004): A statistically significant downward trend (down by 7.4%).

No-Bail Court Attendance Notice*

Trend (Jan 2003 - Dec 2004): A statistically significant downward trend (down by 13.7%)

Figure 11: Persons issued with No-Bail Court Attendance Notice

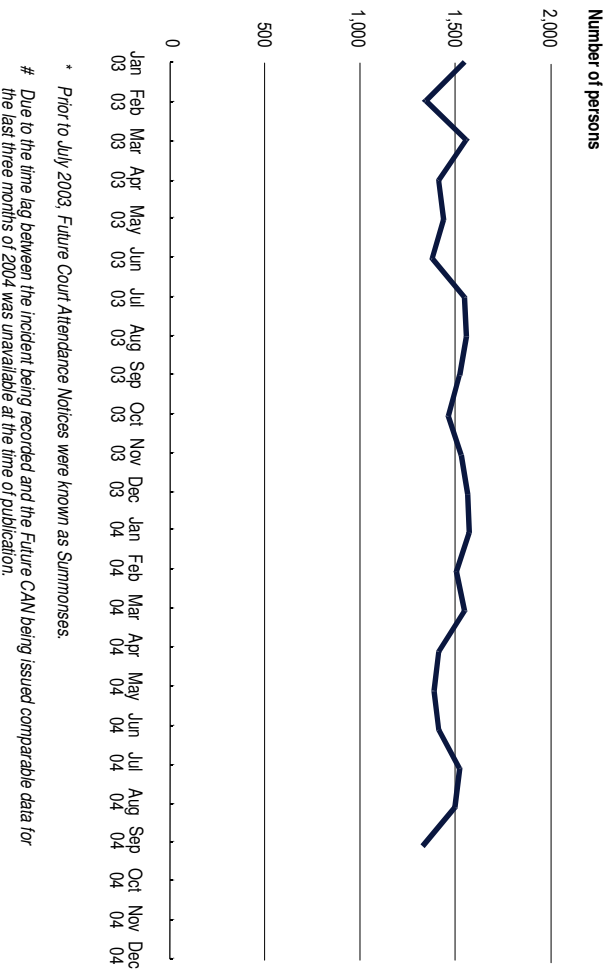

* Prior to July 2003, No-Bail Court Attendance Notices were known as Court Attendance Notices.

Future Court Attendance Notice**

Trend (Oct 2002 - Sep 2004): No statistically significant upward or downward trend.

Figure 12: Persons issued with Future Court Attendance Notice

* Prior to July 2003, Future Court Attendance Notices were known as Summonses.

** Due to the time lag between the incident being recorded and the Future CAN being issued comparable data for the last three months of 2004 was unavailable at the time of publication.

Field Court Attendance Notice*

Trend (Jan 2003 - Dec 2004): A statistically significant upward trend (up by 15.9%).

Figure 13: Persons issued with a Field Court Attendance Notice

* Field Court Attendance Notices have not changed.

NOTES

1. Australian Bureau of Statistics 2004, *Crime and Safety, New South Wales, April 2004*, Cat. No.4509.1, ABS, Sydney.
2. The trend test used was Kendall's rank-order correlation test (see for example, Conover, W.J., *Practical Non-Parametric Statistics*, 2nd edn, John Wiley and Sons, pp 256-260). A two tailed test was used to determine whether there had been an increasing or decreasing trend in the recorded numbers of criminal incidents over the most recent twenty-four month period covered in the report. Some month to month variations in the numbers could be due in part to seasonal factors. The test for trend is not sensitive to seasonal variations; it is sensitive only to a generally increasing or decreasing trend over the time period examined.
3. In the case of murder, there was no statistically significant trend in the monthly numbers of recorded victims.
4. For the rate calculations, population data were obtained from the Australian Bureau of Statistics publication: *Regional Population Growth Australia and New Zealand 2002-03*, Cat. No. 3218.0 (for 2002 and 2003 population estimates). As no population estimates were available for 2004 when this report was published, rates for 2004 were calculated using 2003 population estimates.
