

# NEW SOUTH WALES RECORDED CRIME STATISTICS

Quarterly Update  
September 2012

**Revised Edition September 2018**

**NSW  
Statistical Areas  
and  
Local Government Areas**

## REVISED EDITION

This is a revised edition of the original report. The revision was created in September 2018 to incorporate updates to the historic counts of murder and drug possession offences. The murder revisions have increased the number of murder victims by 4% between 2011 and 2017. The drug possession revisions have resulted in a 25% reduction in the volume of these offences from 2010 due to some incidents previously being double counted.

**NSW Bureau of Crime Statistics and Research**

## CONTENTS

<b>SECTION 1: OVERVIEW OF TRENDS IN VIOLENT AND PROPERTY CRIME</b>	<b>. . . . 3</b>
Table 1.1 Trends in violent and property offences, over the 60 months to September 2012, NSW Statistical Divisions (SDs) and NSW	. . . . 4
Table 1.2 Trends in violent and property offences, over the 60 months to September 2012, NSW Metropolitan Statistical Subdivisions (SSDs)	. . . . 5
Table 1.3 Trends in violent and property offences, over the 60 months to September 2012, NSW Local Government Areas (LGAs)	. . . . 6
<b>SECTION 2: OVERVIEW OF TRENDS IN RECORDED CRIME, BY OFFENCE TYPE</b>	<b>. . . . 9</b>
Table 2.1 Trends in recorded criminal incidents for major offences, over the 60 months to September 2012, NSW	. . . . 10
Table 2.2 Number and trends in recorded criminal incidents for 62 offences, over the 24 months to September 2012, NSW	. . . . 11
<b>SECTION 3: TRENDS, RATE COMPARISONS AND RECORDED CRIMINAL INCIDENTS FOR MAJOR OFFENCES, NSW REGIONS AND LGAS</b>	<b>. . . . 13</b>
Table 3.1A Trends in recorded criminal incidents for major offences, over the 24 months to September 2012, NSW SDs	. . . . 14
Table 3.1B Ratio to NSW rate of recorded criminal incidents per 100,000 population for major offences, over the 12 months to September 2012, NSW SDs	. . . . 14
Table 3.1C Number of recorded criminal incidents for major offences, over the 12 months to September 2012, NSW SDs	. . . . 15
Table 3.1D Number of recorded criminal incidents for major offences, over the 12 months to September 2011, NSW SDs	. . . . 15
Table 3.2A Trends in recorded criminal incidents for major offences, over the 24 months to September 2012, NSW Metropolitan SSDs	. . . . 16
Table 3.2B Ratio to NSW rate of recorded criminal incidents per 100,000 population for major offences, over the 12 months to September 2012, NSW Metropolitan SSDs	. . . . 16
Table 3.2C Number of recorded criminal incidents for major offences, over the 12 months to September 2012, NSW Metropolitan SSDs	. . . . 17
Table 3.2D Number of recorded criminal incidents for major offences, over the 12 months to September 2011, NSW Metropolitan SSDs	. . . . 17
Table 3.3A Trends in recorded criminal incidents for major offences, over the 24 months to September 2012, NSW LGAs	. . . . 18
Table 3.3B Ratio to NSW rate of recorded criminal incidents per 100,000 population for major offences, over the 12 months to September 2012, NSW LGAs	. . . . 20
Table 3.3C Number of recorded criminal incidents for major offences, over the 12 months to September 2012, NSW LGAs	. . . . 22
Table 3.3D Number of recorded criminal incidents for major offences, over the 12 months to September 2011, NSW LGAs	. . . . 24
<b>NOTES: TRENDS IN RECORDED CRIMINAL INCIDENTS IN NSW</b>	<b>. . . . 27</b>

<sup>^</sup> For further explanation of **trend results**, see page 27, Notes [5] and [6].

<sup>\*</sup> For further explanation of **violent offences** and **property offences**, see page 27, Note [7].

<sup>#</sup> For further explanation of **rate calculation populations** and the **ratio to NSW rate**, see page 27, Footnote 3 and Note [8].

Sydney LGA can be considered a special case since the population used to calculate the rate is much lower than the population using the area for work and entertainment. This will be reflected in higher incident rates.

\* LGA murder counts are in the Crime Mapping Tool (<http://crimetool.bocsar.nsw.gov.au/bocsar/>) and elsewhere on the BOCsAR website ([www.bocsar.nsw.gov.au/](http://www.bocsar.nsw.gov.au/))

## NOTES: TRENDS IN RECORDED CRIMINAL INCIDENTS FOR NSW

[1] Irrespective of how trends in recorded crime are presented, their interpretation is a difficult task. The recorded criminal incident data presented in this report are based on information derived from the NSW Police Force Computerised Operational Policing System (COPS), so only those incidents which are reported to, or detected by, police are included. The trends in recorded crime shown in this report will, therefore, reflect movements in the underlying factors which influence the detection, reporting and recording of crime, as well as changes in the true level of crime in the community.

[2] An alternative measure of the level of crime in Australia is available from crime victim surveys, for example the national Crime Victimization Survey (now in its third year) by the Australian Bureau of Statistics (ABS)<sup>1</sup>. As well as providing an estimate of the victimisation rate at the State level for a selected set of offences, this survey estimates the proportion of crimes which are not reported to police, and are therefore not recorded in the official statistics. In particular, personal crimes, such as assault and robbery, are less likely to be reported than crimes which involve households. Given that some offences have low reporting rates, it is possible that changes in recorded crime rates over time for these offences may be reflecting changes in reporting rates.

This ABS publication contains three years of personal and household summary crime data obtained from a national survey, some of which is disaggregated to state level (see Table 2 and Table 3). For NSW, the latest report states that physical assault for those aged 15 and over was reported to police 54.6 percent of the time (not significantly different to the 54.5 percent in 2009-10) with a personal victimisation rate of 2.8 percent (not significantly different to the 2.4 percent estimate from 2009-10). For households, NSW break-ins were reported to police 81.2 percent of the time (significantly up from 69.5 percent in 2009-10) with a household victimisation rate of 2.7 percent (not significantly different to the 2.5 percent in 2009-10). For NSW the above estimates of the victimisation rates were not significantly different over the financial years 2008-9 to 2010-11.

[3] Public willingness to report crime, however, is just one of the extraneous factors which can affect trends in recorded crime. Shifts in policing policy can also have a marked effect on the number of recorded drug offences, cases of offensive behaviour or of receiving stolen goods. For these offences, therefore, recorded rates probably do not accurately reflect actual rates. For this reason, the more detailed comparisons of crime rates and examination of trends in this document are restricted to offence categories which are more likely to be reported to, rather than detected by police.

[4] The interpretation of trends in official reports of crime can be considerably more difficult than the interpretation of trends in unemployment or inflation statistics. The ease with which recorded crime statistics can be misunderstood creates a temptation to offer an authoritative explanation for each major crime trend. Indeed, in many instances it is simply impossible to state with any assurance why a particular trend has appeared. This report, therefore, confines itself to identifying and describing trends in recorded crime, rather than explaining them.

[5] For each offence category or subcategory (except murder), a statistical test for trend was applied to the monthly numbers of recorded criminal incidents over the relevant period. In the case of murder, the statistical test for trend was applied to the monthly numbers of victims over the period. The trend test used was Kendall's rank-order correlation test (see, for example, Conover, W.J. 1980, *Practical Non-Parametric Statistics*, 2nd ed, John Wiley and Sons, pp 256-260). A two-tailed test was used to determine whether there had been an increasing or decreasing trend in the recorded numbers of criminal incidents over the relevant period covered in the report. Some month to month variations in the numbers of recorded incidents could be due in part to seasonal factors. The test for trend is not sensitive to seasonal variations; it is sensitive only to a generally increasing or generally decreasing trend over the time period examined.

[6] For the trend tests throughout this publication, where a statistically significant trend was found ( $p < .05$ ), the extent of the trend is indicated by percentage change in the total number of recorded criminal incidents between the latest two consecutive 12-month periods for 24 month tests; and the average annual percentage change between the first 12-month period and the latest 12-month period for longer tests. A trend test was not performed if there were fewer than 20 incidents in any of the years for the period in question. The result ' . ' indicates that a trend test was not performed. A non-significant test result ( $p > .05$ ) is denoted by 'Stable' or by 'ns' in some larger LGA tables.

[7: refer to annual report] In order to present an overview of crime trends in NSW the information in Section 1 relates to aggregate *violent* and *property* crime. The State graphs for *violent* and *property offences* are plotted as monthly rates<sup>3</sup> per 100,000 population. The State graph for *violent offences* shows distinct seasonality and the 12-month moving average (light grey line) indicates a slight downward path over the past few years, whilst the *property offences* graph and the 6-month moving average (light grey line) both indicate a strong downwards path since about 2000.

Violent offences include: *murder, assault - domestic violence related, assault - non-domestic violence related, assault police, robbery without a weapon, robbery with a firearm, robbery with a weapon not a firearm, sexual assault and indecent assault / act of indecency / other sexual offences*. Property offences include: *break and enter dwelling, break and enter non-dwelling, motor vehicle theft, steal from motor vehicle, steal from retail store, steal from dwelling, steal from person, stock theft other theft and fraud*

[8] The ratio to NSW rate statistics are a comparison of a NSW regional rate per 100,000 population to the NSW rate per 100,000 population. A ratio of one indicates parity with the NSW rate. Ratios indicating double the NSW rate (or more) before rounding are highlighted in red, whilst ratios indicating half the NSW rate (or less) before rounding are highlighted in yellow.

1. Australian Bureau of Statistics 2012, 45300DO001\_201011 *Crime Victimization, Australia, 2010-11*, Cat. No. 4530.0, ABS, Sydney.

2. Australian Bureau of Statistics 2011, 45300DO001\_201011 *Crime Victimization, Australia, 2010-11*, Tables 2 and 3, Cat. No. 4530.0, ABS, Sydney.

3. For the rate calculations throughout this publication, population data were obtained from the Australian Bureau of Statistics publication: *Regional Population Growth Australia 2009-10* Cat. No. 3218 (for 2009 and 2010 population estimates). As no population estimates were available for 2011 when this report was published, rates for 2011 were calculated using 2010 population estimates.
