This page is intentionally blank to accommodate double sided printing.

INTRODUCTION

This report is a quarterly update of trends in recorded criminal incidents in New South Wales.The report shows trends in 17 major crime categories. The offences reported are those for which the number of recorded incidents is a reliable indicator of the actual incidence of the offence. Offences where the number of recorded incidents reflects the level of policing are not included in this report. Trends are reported for the whole of New South Wales, the 12 NSW Statistical Divisions and the 14 Sydney Statistical Subdivisions.

Trends are calculated by the application of a statistical test for trend[1] to the monthly numbers of recorded criminal incidents over the last eight quarters (24 months) for each offence category except for murder*.

For offences where a statistically significant trend was found, the extent of the trend is indicated by the percentage change in the total number of recorded incidents (for murder, recorded victims) between the last 12-month period and the preceding 12-month period; and between the last 12-month period and the 12-month period 48 months earlier.

Note that the time lag between the reporting of criminal incidents to police and the verification of these incidents on COPS means that some upward revision of data cannot be avoided, particularly for the latest month of the report period.

SUMMARY OF RECORDED CRIME TRENDS IN NEW SOUTH WALES

Offence category	Annual percentage change over the last 24 months	Average annual percentage change over the last 60 months
Murder*	Stable	Stable
Assault - domestic violence related	Stable	Stable
Assault - non-domestic violence related	Stable	Stable
Sexual assault	Stable	Stable
Indecent assault, act of indecency and other sexual offences	Stable	Stable
Robbery without a weapon	Down by 19.8%	Down by 4.6%
Robbery with a firearm	Stable	Stable
Robbery with a weapon not a firearm	Down by 14.9%	Down by 9.0%
Break and enter dwelling	Down by 4.7%	Down by 4.2%
Break and enter non-dwelling	Down by 12.9%	Down by 7.7%
Motor vehicle theft	Down by 12.2%	Down by 7.6%
Steal from motor vehicle	Down by 19.1%	Stable
Steal from retail store	Up by 6.2%	Up by 1.8%
Steal from dwelling	Stable	Down by 4.6%
Steal from person	Down by 9.1%	Down by 5.9%
Fraud	Stable	Stable
Malicious damage to property	Stable	Up by 1.6%

1. The trend test used was Kendall's rank-order correlation test (see, for example, Conover, W.J. 1980, *Practical Non-Parametric Statistics*, 2nd ed, John Wiley and Sons, pp 256-260). A two-tailed test with a 0.05 significance level cut off ($\alpha=0.05$) was used to determine whether there had been an increasing or decreasing trend in the number of recorded criminal incidents over the most recent twenty-four month period covered in the report. Some month-to-month variation in the number of recorded criminal incidents could be due in part to seasonal factors. The test for trend is not sensitive to seasonal variation; it is sensitive only to a generally increasing or generally decreasing trend over the time period examined.

* For murder, the trend test is applied to the monthly number of recorded victims rather than criminal incidents.

Table 1: **Number of recorded criminal incidents in the two consecutive 12-month periods to June 2009^.**
Statistically significant trends and percentage changes are shown where appropriate.

NEW SOUTH WALES Type of offence		Number of recorded criminal incidents		Trend over 24 month period^	
		12 months ending June 2008	12 months ending June 2009		
Homicide	Murder*	88	68	STABLE	
	Attempted murder	62	45	STABLE	
	Murder accessory, conspiracy	5	4	N.A.	
	Manslaughter *	13	7	N.A.

	Fraud	37,134	36,280	STABLE	
	Other theft	38,816	36,010	DOWN	7.2%
Arson		7,274	7,161	STABLE	
Malicious damage to property		108,475	106,040	STABLE	
Drug offences	Possession and/or use of cocaine	411	523	UP	27.3%
	Possession and/or use of narcotics	825	971	UP	17.7%
	Possession and/or use of cannabis	13,346	15,907	UP	19.2%
	Possession and/or use of amphetamines	2,639	2,377	DOWN	9.9%
	Possession and/or use of ecstasy	1,373	2,106	UP	53.4%
	Possession and/or use of other drugs	1,504	1,816	UP	20.7%
	Dealing, trafficking in cocaine	128	131	STABLE	
	Dealing, trafficking in narcotics	229	346	UP	51.1%
	Dealing, trafficking in cannabis	507	489	STABLE	
	Dealing, trafficking in amphetamines	791	773	DOWN	2.3%
	Dealing, trafficking in ecstasy	430	427	STABLE	
	Dealing, trafficking in other drugs	118	113	STABLE	
	Cultivating cannabis	1,150	1,076	STABLE	
	Manufacture drug	47	60	STABLE	
	Importing drugs	25	18	N.A.	
	Other drug offences	3,060	3,288	UP	7.5%
Prohibited and regulated weapons offences		8,438	8,523	STABLE	
Disorderly conduct	Trespass	9,231	8,967	STABLE	
	Offensive conduct	8,236	8,732	STABLE	
	Offensive language	6,501	6,772	UP	4.2%
	Criminal intent	1,517	1,482	STABLE	
Betting and gaming offences		337	275	STABLE	
Liquor offences		18,087	17,948	STABLE	
Pornography offences		196	49	DOWN	75.0%
Prostitution offences		202	184	STABLE	
Against justice procedures	Escape custody	220	214	STABLE	
	Breach Apprehended Violence Order	11,634	12,009	STABLE	
	Breach bail conditions	21,571	23,950	UP	11.0%
	Fail to appear	867	870	STABLE	
	Resist or hinder officer	7,790	7,681	STABLE	
	Other offences against justice procedures	683	625	STABLE	
Transport regulatory offences		39,054	40,501	STABLE	
Other offences		15,743	15,251	STABLE	

* For murder, the trend test is applied to the monthly number of recorded victims rather than criminal incidents.
^ Shows the results of a statistical test for a significant upward or downward trend in the monthly number of criminal incidents recorded over 24 months. Where the trend is significant the percentage change in the number of incidents between the last 12-month period and the preceding 12-month period is shown. 'STABLE' indicates there was no significant upward or downward trend whereas 'N.A.' indicates that the number of incidents recorded was too small for a reliable trend test to be performed.

^ *This table shows the results of a statistical test for significant upward (highlighted in red) or downward (highlighted in yellow) trends in the number of recorded criminal incidents over a 24-month period. The trend test used is Kendall's rank-order correlation test. Where the trend is significant (p<0.05), the percentage change between the last 12-month period and the preceding 12-month period is shown. A trend test was not performed if there were fewer than 20 incidents in either of the two years for the period in question; the result ' . ' indicates that a trend test was not performed. A non-significant test result is denoted by 'ns'.*
* *The trend test for Sydney and NSW on the offence of murder is for the number of victims, not incidents.*

Table 2b: Ratio^ of the rate^^ of recorded criminal incidents per 100,000 population compared with NSW for major offences over the 12 months to June 2009, NSW Statistical Divisions.

Statistical Division	Murder*	Assault - domestic violence related	Assault - non-domestic violence related	Sexual assault	Indecent assault, act of indecency and other sexual offences	Robbery without a weapon	Robbery with a firearm	Robbery with a weapon not a firearm	Break and enter dwelling	Break and enter non-dwelling	Motor vehicle theft	Steal from motor vehicle	Steal from retail store	Steal from dwelling	Steal from person	Fraud	Malicious damage to property

^ *Ratios are a comparison of NSW SD rates per 100,000 population to the NSW rate per 100,000 population. A ratio of one indicates parity with the state rate. Ratios indicating double the NSW rate (or more) are highlighted in red, whilst ratios indicating half the state rate (or less) are highlighted in yellow.*
^^ *For the rate calculations, population data were obtained from the Australian Bureau of Statistics publication: Regional Population Growth Australia 2006-07 Cat. No. 3218 (for 2006 and 2007 population estimates). As no population estimates were available for 2008 when this report was published, rates for 2008 were calculated using 2007 population estimates.*
* *The rate calculations on the offence of murder is for the number of victims, not incidents.*

^ This table shows the results of a statistical test for significant upward (highlighted in red) or downward (highlighted in yellow) trends in the number of recorded criminal incidents over a 24-month period. The trend test used is Kendall's rank-order correlation test. Where the trend is significant (p<0.05), the percentage change between the last 12-month period and the preceding 12-month period is shown. A trend test was not performed if there were fewer than 20 incidents in either of the two years for the period in question; the result ' . ' indicates that a trend test was not performed. A non-significant test result is denoted by 'ns'.

Table 3b: Ratio^ of the rate^^ of recorded criminal incidents per 100,000 population compared with NSW for major offences over the 12 months to June 2009, NSW Metropolitan Statistical Subdivisions.

Metropolitan Statistical Subdivision	Murder*	Assault - domestic violence related	Assault - non-domestic violence related	Sexual assault	Indecent assault, act of indecency and other sexual offences	Robbery without a weapon	Robbery with a firearm	Robbery with a weapon not a firearm	Break and enter dwelling	Break and enter non-dwelling	Motor vehicle theft	Steal from motor vehicle	Steal from retail store	Steal from dwelling	Steal from person	Fraud	Malicious damage to property

^ Ratios are a comparison of SSD rates per 100,000 population to the NSW rate per 100,000 population. A ratio of one indicates parity with the state rate. Ratios indicating double the NSW rate (or more) are highlighted in red, whilst ratios indicating half the state rate (or less) are highlighted in yellow.

^^ For the rate calculations, population data were obtained from the Australian Bureau of Statistics publication: Regional Population Growth Australia 2006-07, Cat. No. 3218.0 (for 2006 and 2007 population estimates). As no population estimates were available for 2008 when this report was published, rates for 2008 were calculated using 2007 population estimates.

* The rate calculations on the offence of murder is for the number of victims, not incidents.

Table 3c: Number of recorded criminal incidents for major offences, 12 months ending June 2009 NSW Metropolitan Statistical Subdivisions.

^ This table shows the results of a statistical test for significant upward (highlighted in red) or downward (highlighted in yellow) trends in the number of recorded criminal incidents over a 24-month period. The trend test used is Kendall's rank-order correlation test. Where the trend is significant (p<0.05), the percentage change between the last 12-month period and the preceding 12-month period is shown.

* There were no LGAs with 20 murder victims in both the two 12-month periods, hence no trend tests were reported. The trend test for NSW on the offence of murder is for the number of victims, not incidents.

A trend test was not performed if there were fewer than 20 incidents in either of the two years for the period in question; the result ' . ' indicates that a trend test was not performed. A non-significant test result is denoted by 'ns'.

Table 4b: Ratio^ of the rate^^ of recorded criminal incidents per 100,000 population compared with NSW for major offences over the 12 months to June 2009, NSW Local Government Areas

NSW LGAs	Murder*	Assault - domestic violence related	Assault - non-domestic violence related	Sexual assault	Indecent assault, act of indecency and other sexual offences	Robbery without a weapon	Robbery with a firearm	Robbery with a weapon not a firearm	Break and enter dwelling	Break and enter non-dwelling	Motor vehicle theft	Steal from motor vehicle	Steal from retail store	Steal from dwelling	Steal from person	Fraud	Malicious damage to property

^ Ratios are a comparison of NSW LGA rates per 100,000 population to the NSW rate per 100,000 population. A ratio of one indicates parity with the state rate. Ratios indicating double the NSW rate (or more) are highlighted in red, whilst ratios indicating half the state rate (or less) are highlighted in yellow.

Sydney LGA can be considered a special case since the population used to calculate the rate is much lower than the population using the area for work and entertainment and this will be reflected in higher incident rates.

^^ For rate calculations, refer to Explanatory Notes p. 6 regarding population data used. A result of ' . ' indicates either that there were no relevant offences recorded in the LGA, or that the population is less than 3,000 people and no rate was calculated.

Table 4c: Number of recorded criminal incidents for major offences, 12 months ending June 2009, NSW Local Government Areas.

NSW LGAs	Murder*	Assault - domestic violence related	Assault - non-domestic violence related	Sexual assault	Indecent assault, act of indecency and other sexual offences	Robbery without a weapon	Robbery with a firearm	Robbery with a weapon not a firearm	Break and enter dwelling	Break and enter non-dwelling	Motor vehicle theft	Steal from motor vehicle	Steal from retail store	Steal from dwelling	Steal from person	Fraud	Malicious damage to property
