

NEW SOUTH WALES RECORDED CRIME STATISTICS

Quarterly Update
September Quarter 2021

This report presents data on crime reported to, or detected by, police and recorded on the NSW Police Force's Computerised Operational Policing System (COPS). Information is provided on 13 major offence categories, which include the most serious personal violence and property offences, plus a more detailed list of 62 specific offence types.

APPENDIX 2 EXPLANATORY NOTES

What are crime statistics?

BOCSAR's crime statistics consist of criminal incidents reported to, or detected by, police and recorded on the NSW Police Force's Computerised Operational Policing System (COPS). While this system is used for record-keeping for all police operations, not just for criminal matters, BOCSAR only reports on criminal incidents and selected policing activities. BOCSAR's crime statistics therefore do not capture crimes that are not recorded on COPS. The Australian Bureau of Statistics conducts regular crime and victim surveys which attempt to capture a snapshot of both reported and unreported crimes.

How to interpret crime statistics

Recorded crime statistics for some offence categories do not accurately reflect the actual level of crime in the community. This is because the number of incidents recorded may be affected by extraneous factors which are not easily measured. In particular:

- > Public willingness to report crime Many crimes which occur are not reported to police and will therefore not be recorded for example, a large number of assaults, sexual assaults and robberies are not reported to police.
- > Shifts in policing policy Recording of those offences which are detected by, rather than reported to police, are strongly affected by policing practices examples of these are drug offences, drink driving offences, offensive behaviour and receiving stolen goods. Recorded rates for such offences do not accurately reflect actual rates.
- > High visitor populations compared to residential populations Sydney Local Government Area has relatively high recorded crime rates because, compared with other regions, the resident population is small relative to the number of people in the area. In other words, the area has a high user population which is not reflected in the denominator of the rate calculation.
- > Areas with small residential populations Recorded crime rates in Local Government Areas with small population sizes are not always a good indicator of offending. Crime rates in areas with populations under 3,000 may be unreliable and should be interpreted with caution.

What offences are included?

BOCSAR's standard quarterly publications report on 13 major offence categories, which include serious personal violence and property offences. In addition to these offences, we also release data for 62 specific offence categories.

From the September Quarter 2021 report, the offence category previously labelled 'indecent sexual assault, act of indecency and other sexual offences' is labelled 'sexual touching, sexual act and other sexual offences'.

Commencing March 2020, the NSW Government issued public health orders under the *NSW Public Health Act 2010* (NSW) to limit the spread of COVID-19. Police can issue a fine or court attendance notice for failure to comply with the orders. Breaches of these orders are counted as "Other offences" in this report.

What is being counted?

> Incidents: When a crime is reported to, or detected by, the NSW Police they record it as a criminal event on COPS. The event date is the date that the crime was reported. Unless otherwise stated, the date BOCSAR attaches to a crime is the event date. One criminal event can contain multiple criminal incidents. BOCSAR's default counting unit for crime data is criminal incidents with the exception of murder and manslaughter. Criminal incidents are activities detected by or reported to police which involve the same offender(s) and victim(s); occur at the one location during one uninterrupted period of time; fall into one offence category and one incident type. For murder and manslaughter only, the counting units used are victims.

>Alleged offenders: BOCSAR also reports on alleged offenders or 'Persons of Interest' (POIs) who have had a legal proceeding commenced against them by the NSW Police Force. Within the police recorded crime data POIs may not have been convicted in court, however they have been proceeded against in some way or another by the police. There could be quite some time between an event being recorded by police, an investigation being completed and an alleged offender (i.e. a POI) being charged. Consequently, POIs are counted in the time period they were proceeded against, rather than the time period the event /incident was reported to or recorded by police.

Legal proceedings against alleged offenders presented in Tables 3.1 and 3.2 include persons proceeded against to court and persons diverted from court (by way of criminal infringement notice, cannabis or other drug caution and diversions under the Young Offenders Act 1997, including Youth Justice Conference, Caution and Warning).

Infringement Notices (fines) are not included in this report but have been included in past reports as they are not a form of court diversion.

What are crime trends and how are they calculated?

In general, BOCSAR relies upon the Kendall Rank Order Correlation statistical test (or Kendall's taub) to determine whether a series is trending upwards, downwards or is stable (p<.05). In some tables a stable trend is represented by 'ns' (not significant). The statistical test is applied to the monthly data over the specified period. Where a significant trend is found, the average annual percentage change over the time period is reported. If any of the 12-monthly totals in the series have a value of less than 20, a trend test is not conducted. When this occurs, the relevant cell will be left blank or contain 'n.c.' (not calculated). For murder and manslaughter incidents, the trend test is applied to the monthly number of recorded victims rather than criminal incidents.

How is the ratio to NSW calculated?

The ratio to NSW rate statistics are a comparison of a NSW regional rate per 100,000 population to the NSW rate per 100,000 population. A ratio of one indicates parity with the NSW rate. Ratios indicating double the NSW rate (or more) before rounding are highlighted in red, whilst ratios indicating half the NSW rate (or less) before rounding are highlighted in green. Ratios are not calculated for regions with a population of less than 3,000.

How are 'young people' and 'adults' defined?

The term 'young people' refers to persons aged 10-17 years at the time of the offence; 'adults' refers to persons aged 18 years and older at the time of the offence.

Regional Statistics

Statistics are provided on the number of criminal incidents (victims for murder) recorded for each of the Statistical Areas Level 4 (SA4s) of NSW as defined by the Australian Bureau of Statistics (ABS). Recorded criminal incidents which occurred in correctional, detention or remand centres, however, are not counted in the SA in which the incident occurred. Note that LGA boundaries change from time to time. A criminal incident is counted within a particular region when the location of the offence falls within that region.

What is included in 'selected policing activities'?

- > Bail compliance checks: checks conducted by police to assess if bail conditions are being complied with.
- > ADVO compliance checks: checks conducted by police to assess if ADVO conditions are being complied. These checks can also include checking on the person in need of protection and taking the necessary action if a breach is detected.
- > Move on directions: a 'move on direction' is a direction given to a person by a police officer, under section 198 of the *Law Enforcement (Powers and Responsibilities) Act 2002* (NSW), to leave a public place and not return for a specified period.
- > Searches: If the police have reasonable grounds they may, without a warrant, stop and search a person and anything in their possession or under their control, including a vehicle.
- > Detain/convey person to mental health facility: The police detain a person at risk of harm to themself or others and transport them to a mental health facility for assessment under section 22 of the *Mental Health Act 2007* (NSW).

What are non-criminal domestic violence episodes?

Incidents attended by police where a domestic dispute is recorded as having taken place but no criminal incident has been recorded. The vast majority of these episodes are verbal altercations.

Where can I find more detail and explanatory notes?

Detailed definitions and explanatory notes are available at

https://www.bocsar.nsw.gov.au/Pages/bocsar crime stats/bocsar glossary.aspx
